1 Project Details

Software	VET Module
Version Number	1.70.02

2 Details of Release

The release of VET 1.70.02 contains minimal changes and does not impact greatly on the existing functionality of the module

The release also rectifies a known bug present in the previous version of the VET module.

3 Item # 1 – Enrolment cut-off date

A new Enrolment Cut-Off date is now in effect and set to “7 AUG 2009”. Navigate to VET Control>Preferences and ensure that this is activated. If this is not the case please log a call with Customer Service Centre on 9264 5555 or 1800 012 828.

In the Student Enrolment Screen you will notice that the following warning message has now gone “Enrolment options have been limited because the cut-off date is in effect – Delete Qualification’ and ‘Delete Competency’ have been disabled.”

4 Bug Fixes

There was a bug in the VET 1.70.01 version which has now been rectified in the release of 1.70.02.

The bug involved students not being assigned a 'Subject Code' during bulk enrolment when the subject code was entered in lower case ie e709 instead of E709. The bug also prevented the affected competency from being edited.
